DividersNY

800-919-RDNY

Our **Walk-Through Wall** is designed to provide optimal privacy, with easy access. Comprised of two walls running parallel that overlap, Walk-Through Wall allows for an entrance to move in and out of the space. The wall is 7 feet tall allowing for space between the ceiling and the top of wall, which provides air circulation, and lighting. The two sections of the wall are braced together allowing for maximum stability. When you are finished with the wall, just have us take it down for free. Leased for up to three years, Walk-Through Wall is ideal for apartments.

Other configurations & layouts, such as L-shape walls or T-shape walls, are available.
